(54) Title: FULLY ADJUSTABLE STOCK FOR RIFLE

(57) Abstract: Adjustable stock for rifle, characterised in that it is divided into two elements by cutting: element (1) remains integral with the barrels and is connected to element (2), which rests on the shoulder of the shooter, by means of pins (8) whose position can be adjusted by screws (10, 11, 12) which allow relative movement of the two elements both laterally and vertically, one in relation to the other, for accurate regulation of the aim on the target.
